Like their name might suggest, Sunglaciers' music blurs the boundaries between dazzling indie rock melodicism and icy post-punk experimentation. Though anchored in the strange realities from our times, their songs are laced with a certain optimism, through well-calculated psych elements and dancy rhythms, making for a rewarding listening experience.

Following up on critically-acclaimed efforts *Foreign Bodies* and *Subterranea*, the Calgary outfit now returns with *Regular Nature* (March 29th, 2024 via Mothland), a third full-length mixed by engineer Mark Lawson (Yves Jarvis, The Unicorns, Land of Talk) and featuring guest appearances by Chad VanGalen and Daniel Monkman (Zoon).

PRESS

"After Blessed, Calgary's Sunglaciers played a set and wowed everyone in the bar. Cups N Cakes writer Drew Cox said they were hands down the best act of the showcase." -Cups N Cakes Network, Winterruption

"This willingness to mine an idea as deeply as possible pays off on *Subterranea*. Thirteen tracks weave in and out of tight spaces, focused vignettes that effervesce and pop as soon as they're born." -Exclaim!

"Sunglaciers may have slightly curbed their penchant for psychedelic jaunts, but the Calgary act remains masters of throwing free-wheeling sonic style into their solid songwriting. *Subterranea* is focused but still playful in a genre-hopping way, offering reverent New Wave studies, propulsive post-punk and endearing pop hooks." -Calgary Herald
